

Office on Smoking and Health
Centers for Disease Control and Prevention
Epidemiology and Partnership Funding Portfolio for Cessation
Ann Malarcher

Funding Update

Title: National Cancer Institute Quitline Evaluation

Closing Date: 09/30/07

Contact: Marti Engstrom

Description: To monitor and assess the public health impact of the National Quitline Initiative

FY2005 funding and mechanism: \$300,000, IAA with NCI

Title: Clinical Practice Guideline Revision

Closing Date: 09/30/07

Contact: Corinne Husten

Description: To update the PHS Tobacco Cessation Guidelines

FY2006 funding: \$100,000, IAA with AHRQ

Title: Youth Tobacco Cessation Collaborative, National Tobacco Cessation Collaborative, Consumer Demand Conference

Closing Date: 09/30/09

Contact: Ann Malarcher

Description: To support the operations of these national collaborative efforts which have outlined goals and objectives for adult and youth cessation and strategies for increasing consumer demand

FY2006 funding: \$62,500, IAA with NCI

Title: American Journal of Public Health Supplement on Young Adult Cessation

Closing Date: 09/30/06

Contact: Ann Malarcher

Description: To support the publishing of the supplement

FY2006 funding: \$12,500, IAA with NCI

Title: Medicaid Survey

Closing Date: 09/30/06

Contact: Abby Rosenthal

Description: To determine current state Medicaid coverage for tobacco dependence treatment

FY2006 funding: \$70,000, Prevention Research Centers

Title: British Medical Journal Supplement on Quitlines

Closing Date: 09/30/06

Contact: Ann Malarcher

Description: To support the publishing of the supplement

FY2006 funding: \$15,000, Purchase Order

Title: Current Population Survey, Tobacco Use Supplement

Closing Date: no current work

Contact: Ann Malarcher

Description: To support collection of data

FY2003-05 funding: \$450,000, IAA NCI

Title: State Youth Tobacco Surveys

Closing Date: 12/31/07

Contact: Peter Mariolis

Description: To support collection of data

Projected FY2007 funding: \$638,000, contract

Title: State Adult Tobacco Surveys

Closing Date: 12/31/07

Contact: Peter Mariolis

Description: To support collection of data

Projected FY2007 funding: \$350,000, contract

Title: National Youth Tobacco Survey

Closing Date: 9/30/06

Contact: Heather Ryan

Description: To support collection of data

FY2006 funding: \$950,000, contract with MACRO

Title: Behavioral Risk Factor Surveillance System Cessation Supplement

Closing Date: 9/30/06

Contact: Ann Malarcher

Description: To support collection of data

FY2006 funding: \$10,000 (limited to cognitive testing of module), TAV to DACH

Title: Business Health Collaboration

Closing Date: 9/31/06

Contact: Ann Malarcher

Description: To support working with business on health issues

FY2006 funding: \$40,000, TAV to OWF

American Legacy Foundation – Current Funding Opportunities
Adin C. Miller

Funding Update

RFQ Title: Small Innovative Grants Initiative

RFQ Issue Date: July 2006

RFQ Close Date: Fall 2006

Description: Through the Small Innovative Grants Program, Legacy supports projects that advance creative, promising solutions based on sound principles of tobacco control to remedy the harm caused by tobacco use in America. In order to be considered for funding, all applicants are required to submit a letter of intent. After reviewing the letters of intent, Legacy invites a limited number of applicants to submit a full proposal. The foundation offers two deadlines per year for letters of intent (approximately every six months).

Legacy typically awards one-year grants of up to \$100,000 under this program. Successful grantees may be invited to apply for a second year at 50% funding with a required 1:1 match. No match is required for the first year.

Robert Wood Johnson Foundation
Marjorie Paloma

Funding Opportunities Update

RFQ Title: Tobacco Policy Change: A Collaborative for Healthier Communities and States

RFQ Issue Date: 06/01/2006 12:00:00 AM EDT

RFQ Close Date: 08/01/2006 03:00:00 PM EDT

Contact: Beverly Alston, Robert Wood Johnson Foundation, tobaccopolicychange@rwjf.org or (888) 795-3636

Description: Through Tobacco Policy Change, RWJF is investing in cutting-edge collaborations that directly address disparities in tobacco use and exposure. Using advocacy, communications and community partnerships, Tobacco Policy Change projects address tobacco policies that have been proven to decrease use, protect nonsmokers from secondhand smoke, help smokers quit or sustain tobacco control at the local, regional and national level. Policies includes comprehensive clean indoor air laws; increases in local and state tobacco excise taxes or product price increases, with at least a portion of these funds allocated to tobacco prevention and treatment programs and other health care issues; increases in public funding of tobacco-related programming for those states receiving Master Settlement Agreement and tobacco excise tax revenue; public and private coverage of cessation treatment for populations most affected by tobacco; and restrictions in tobacco product placement, licensing and land use.

RFQ Title: Substance Abuse Policy Research Program

RFQ Issue Date: 06/01/2006 12:00:00 AM EDT

RFQ Close Date: 08/01/2006 03:00:00 PM EDT

Contact: Susan Frye, Center for Creative Leadership, fryes@leaders.ccl.org or (336) 286-4548

Description: Projects supported by SAPRP are expected to increase understanding of public and private policy interventions to prevent, treat and reduce the harm caused by the use of tobacco, alcohol and other drugs—including the advantages, development, implementation, disadvantages and potential impact of these policies. Results from SAPRP-funded grants can help policy makers, government administrators, judicial systems, the media, advocacy groups, community organizations, and private organizations, such as health maintenance organizations (HMOs), employers, associations, and trade groups. Applicants should address one of the following: health and economic impacts of clean indoor air laws, including immediate population and sub-population-level health impacts; policy, economic and health care system change interventions that boost consumer demand for, and use of, proven cessation treatments; or changes in financing, policy and other factors that are likely to threaten, solidify or extend policy gains. Cutting edge research in other tobacco policy areas, including studies that evaluate unanticipated policy changes and “natural experiments,” will be considered.

Project Title: Designing Innovations in Tobacco Cessation Products and Services to Boost Treatment Use and National Quit Rates

Contact: Todd Phillips, Academy for Educational Development Inc., tphillip@aed.org or (202) 884-8313

Description: This project will catalyze major breakthroughs in the use of proven tobacco cessation treatments by looking to a nontraditional source, the award-winning IDEO consumer product design firm, for fresh ideas to improve the appeal, delivery and use of evidence-based tobacco cessation products and services, especially among smokers in underserved low-income and racial/ethnic populations. This project supports the application of IDEO's innovative design principles and processes to 5-10 "sentinel" cessation treatment re-design projects, creating and testing prototypes of treatments that are re-configured to more successfully engage and assist smokers throughout their quitting journeys and doing so in a way that helps the organizations delivering these interventions learn design thinking and methods. From this project will emerge prototypes and case studies based on these re-design projects as well as a generic design framework and principles that can be broadly applied to new and existing treatments. This project is part of the national Consumer Demand Roundtable which is led by the Academy for Educational Development (AED) and co-funded by RWJF, the American Cancer Society (ACS), CDC, Legacy Foundation, National Cancer Institute (NCI), National Institute on Drug Abuse (NIDA) and NIH Office of Behavioral and Social Sciences Research (OBSSR).

NIH/ Fogarty Center

blochm@mail.nih.gov

National Institute on Drug Abuse
Steve Gust, Ph.D.
Telephone: (301) 443-6480
Fax: (301) 443-9127
sgust@mail.nih.gov

Description: This new program supports trans-disciplinary research and capacity building projects that address the burden of tobacco consumption in low- and/or middle-income nations by 1) pursuing observational, intervention and policy research of local importance and 2) building capacity in these region in epidemiological and behavioral research, prevention, treatment, communications, health services and policy research. Both research and capacity building must be included in all applications.

The program is designed to promote international cooperation between investigators in the United States and other high-income nation(s) pursuing research programs on tobacco control, and scientists and institutions in low- and/or middle-income nation(s), where tobacco consumption is a current or anticipated public health urgency. The major portion of the research must be conducted in a low- and/or middle-income nation(s), and greater than 50 percent of the direct costs requested must be used in a low- and/or middle-income nation(s) or "in-country" for either research and/or capacity strengthening of foreign institutions

Funding Opportunities

Title: Community Participation In Research

ID: PAR-05-026

Funding mechanism: NIH research project grant (R01)

Expiration Date: 18 May 2007

Website: <http://grants.nih.gov/grants/guide/pa-files/PAR-05-026.html>

ID: PAR-06-247

Funding mechanism: NIH exploratory/developmental grant (R21)

Expiration Date: 18 May 2007

Website: <http://grants.nih.gov/grants/guide/pa-files/PAR-06-247.html>

Contact: Representatives of participating Institutes and Centers are listed on websites.

Description: The goal of this announcement is to support research on health promotion, disease prevention, and health disparities that is jointly conducted by communities and researchers. The process of community-based participatory research is such that community members, persons affected by the health condition, disability or issue under study, or other key stakeholders in the community's health have the opportunity to be full participants in each phase of the work (from conception - design - conduct - analysis - interpretation - conclusions - communication of results). Community-partnered approaches to research promise to deepen our scientific base of knowledge in the areas of health promotion, disease prevention, and health disparities. Community-partnered research processes offer the potential to generate better-informed hypotheses, develop more effective interventions, and enhance the translation of the research results into practice.

Title: Understanding and Promoting Health Literacy

ID: PAR-04-116

Funding mechanism: NIH research project grant (R01)

Expiration Date: 14 October 2006

Website: <http://grants.nih.gov/grants/guide/pa-files/PAR-04-116.html>

ID: PAR-06-132

Funding mechanism: NIH small research grant (R03)

Expiration Date: 14 October 2006

Website: <http://grants.nih.gov/grants/guide/pa-files/PAR-06-132.html>

Contact: Representatives of participating Institutes and Centers are listed on websites.

Description: The goal of this funding opportunity is to encourage the development of empirical research on health literacy concepts and theory as these relate to the NIH public health goal of improving health outcomes for persons with medical and behavioral disorders and conditions. This announcement invites applications to develop research on health literacy in general areas that include, but are not limited to, the following: modeling and measuring the nature and scope of health literacy; variation in health literacy over the life course or among native and non-native speakers of English; mediators and moderators of low health literacy; the impact of low health literacy on health outcomes, diseases, behaviors and treatments, including the contribution of health literacy to informed decision-making, adherence to preventative or therapeutic regimens, utilization of health care services, risk avoidance strategies, and other consumer health-care

related actions; the identification of effective preventive and other interventions to improve health literacy among populations and to enable the healthcare and public health systems to communicate effectively across different health literacy levels; and the development of effective methods and new technologies in health literacy research.

Title: Dissemination and Implementation Research in Health

ID: PAR-06-039

Funding mechanism: NIH research project grant (R01)

Expiration Date: 2 September 2009

Website: <http://grants.nih.gov/grants/guide/pa-files/PAR-06-039.html>

ID: PAR-06-071

Funding mechanism: NIH small research grant (R03)

Expiration Date: 2 October 2009

Website: <http://grants.nih.gov/grants/guide/pa-files/PAR-06-071.html>

ID: PAR-06-072

Funding mechanism: NIH exploratory/developmental grant (R21)

Expiration Date: 2 October 2009

Website: <http://grants.nih.gov/grants/guide/pa-files/PAR-06-072.html>

Contact: Representatives of participating Institutes and Centers are listed on websites.

Description: This announcement encourages investigators to submit research grant applications that will identify, develop, and refine effective and efficient methods, structures, and strategies that test models to disseminate and implement research-tested health behavior change interventions and evidence-based prevention, early detection, diagnostic, treatment, and quality of life improvement services into public health and clinical practice settings. Dissemination and implementation research intends to bridge the gap between public health, clinical research, and everyday practice by building a knowledge base about how health information, interventions, and new clinical practices are transmitted and translated for public health and health care service use in specific settings. We are inviting applications that will begin to break down the complexity of bridging research and practice.
